PINK PANDA DIGITAL

START HERE

Your Mug Design Generator is ready. Follow this simple order to make your first print-on-demand mug design.

01 **OPEN THE GENERATOR**
Open Mug_Design_Generator.html in a current web browser. You do not need to install an app.

02 **PICK A PRESET OR BUILD YOUR OWN**
Tap a quick-start preset — Funny, Faith, Holiday, Photo, Mom, or Boss — or choose your mug style, theme, words, and colors yourself, one section at a time.

03 **COPY YOUR PROMPT**
Your prompt builds itself live as you pick. Scroll to Your Mug Design Prompt and press COPY PROMPT. The one-click buttons build Full Wrap, Front Design, Funny, Faith, Holiday, Photo Mug, and Collection/Set prompts.

04 **PASTE IT INTO CHATGPT OR GEMINI**
Paste the prompt into a new chat in ChatGPT or Gemini. Making a photo mug? Attach your own picture to that same message. Download the design it creates — and check the spelling of every word.

05 **PRINT IT OR SELL IT**
Upload your design to Printify or Printful, place it on a mug, and order it for yourself, gift it, or publish it to your Etsy shop.

Need details? Open the included Illustrated User Guide — it walks through every section, the ChatGPT and Gemini steps, the Printify and Printful uploads, and listing your mug on Etsy. This generator creates prompts, not the images themselves.
